Specifically, it addresses 1) noise generated by locomotives and rail-cars during line haul operations, 2) noise generated by yard operations from stationary locomotives, locomotive switching, car-coupling impacts, retarders, and load cell test stands, 3) locomotive horn sound levels, 4) noise levels inside locomotive cabs, 5) noise levels inside employee sleeping quarters, and 6) train employee occupational noise exposure. It contains a history of these regulations, a general procedure for conducting a noise measurement or noise exposure monitoring program and regulation-specific measurement and data analysis procedures and guidance for each type of compliance, including planning recommendations and measurement equipment. It also contains example forms and log sheets to help facilitate the documentation of each measurement. These general procedures can be easily adapted to effectively measure most types of railroad-generated noise.
