# Engineering Systems with Intelligence

Filesize: 2.53 MB

Reviews

This sort of book is almost everything and helped me looking in advance and much more. Yes, it can be enjoy, nevertheless an amazing and interesting literature. Its been written in an extremely simple way which is simply right after i finished reading this publication through which in fact altered me, alter the way i really believe.
(Lizeth Witting)

ENGINEERING SYSTEMS WITH INTELLIGENCE

To download **Engineering Systems with Intelligence** eBook, make sure you follow the link below and save the ebook or have access to additional information that are relevant to ENGINEERING SYSTEMS WITH INTELLIGENCE ebook.

Book Condition: New. Publisher/Verlag: Springer Netherlands | Concepts, Tools and Applications | This book contains a selection of papers presented at the "European Robotics and Intelligent Systems Conference" (EURISCON '91) held in Corfu. Greece (June 23-28. 1991). It is devoted to the analysis. design and applications of technological systems with built-in intelligence achieved through appropriate blending of mathematical, symbolic. sensing. computer processing. and feedback control concepts. methods and software / hardware tools. System intelligence includes human-like capabilities such as learning. observation. perception. interpretation. reasoning. planning. decision making. and action. Integrated intelligent decision and control systems obey Saridis' prinCiple of Increasing Precision with Decreasing Intelligence (IPDI). and have a hierarchical structure with three basic levels. namely Organization. Coordination. and Execution Levels. As we proceed from the organization to the execution level. the precision about the jobs to be completed increases and accordingly the intelligence reqUired for these jobs decreases. As an example. it is mentioned here that in an intelligent robotic system the organization tasks can be realized using a neural net. the coordination tasks by a Petri net. and the execution tasks by local sensors and actuators. The field of intelligent systems is a new interdisciplinary field with continuously increasing interest and expansion. It is actually the outcome of the synergetic interaction and cooperation of classical fields such as system theory. control theory. artificial intelligence. operational research. information theory. electronics. communications. and others. | 1 High Autonomy Systems.- Model-Based Architecture for High Autonomy Systems.- 2 Knowledge Based Systems.- Real Time Knowledge Based System: The Next Step.- Expert System Shell Flexibility: BEST Case Study.- The PHOS Conceptual Language for Knowledge Representation.- A Meta Translator of a Logic Grammar that Handles Missing Constituents.- A Truly Declarative Prolog-like Language.- Predicate Logic and Inexact Reasoning.- Diagram Understanding Using Graphics Constraint Grammars.- Knowledge Management in...
