

Mathematical Questions and Solutions in Continuation of the Mathematical Columns of The Educational Times Volume 3 (Paperback)

Filesize: 7.64 MB

Reviews

*A new electronic book with a new point of view. it was writtern extremely completely and beneficial. Its been written in an extremely straightforward way in fact it is simply following i finished reading this publication through which really altered me, alter the way i really believe.

To read **Mathematical Questions and Solutions in Continuation of the Mathematical Columns of The Educational Times Volume 3 (Paperback)** eBook, you should follow the button listed below and download the ebook or have accessibility to other information which might be in conjunction with MATHEMATICAL QUESTIONS AND SOLUTIONS IN CONTINUATION OF THE MATHEMATICAL COLUMNS OF THE EDUCATIONAL TIMES VOLUME 3 (PAPERBACK) book.

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1865 Excerpt: .R, M rcos 5 , iW-p R.sin5 . Hence 1593. (Proposed by H. R. Gbeeb, B.A.)--(1.) Given a conic and two lines, find the (trilinear) coordinates of the point where the polar of the intersection of these meets an assigned one of them. (2.) Hence determine, in trilinear coordinates, the form of the equation of a line perpendicular to a given line. (3.) Determine directly the locus of a point such that if perpendiculars be drawn from it to the sides of a triangle, their feet shall lie in a straight line. (4.) What docs this proposition become by a general homographic transformation? Solution by the Ppoboseb. Let $\rho = 0$ be the conic; $ax + by + cz = 0$, $lx + my + nx = 0$ the given lines; and let it be required to find the point where the former of these is $x y z = l - m \cos C - n \cos B$: $m - n \cos k - l \cos C$: $n - l \cos B - m \sin A$, These expressions are therefore proportional to the coordinates of a point at infinity in a direction perpendicular to $lx + my + nz = 0$. I may remark that the analogous propositions in space are as follows: Given a conicoid and two planes, find the coordinates of the point where the reciprocal polar line (with respect to the conicoid) of the line of intersection of these meets an assigned one of them. And by taking as the conicoid any sphere (say that circumscribing the tetrahedron of reference) and as the assigned plane...
