## Potential of Botanicals for Root-Knot Nematode Management on Tomato

By Taruba Ansari

LAP Lambert Academic Publishing Jul 2016, 2016.

Taschenbuch. Book Condition: Neu. 220x150x7 mm. This item is printed on demand - Print on Demand Neuware - Plant parasitic nematode is one of the major factors causing unbearable and uncontrollable biotic stress in plants and are governing body for the quantitative, qualitative and economic losses to the agriculture industry. Root-knot nematode is one of the the most damaging plant pathogen attack most of vegetables, plants and reduce the market value of the fruit. So over last few years research in the field of nematology for the management of nematode has become a great task for the workers all over the globe in the form of climate smart agriculture for the sustainable future. Since chemical control of plat parasitic nematode by the involvement of synthetic nematicides one of the most potent and effective method for nematode management. However, apart from its very high cost, disturbing the ecological equilibrium of soil, water, environment and most adverse impact on ozone depletion lead to the climate change, has led to the reduction in the amount of nematicides with the replacement of environmental benign, facile and ecofriendly method. Expedient and prudent use of natural biopesticides, integrated soil...

### Reviews

*This sort of publication is almost everything and taught me to hunting forward and much more. Yes, it is actually play, continue to an amazing and interesting literature. I am pleased to tell you that this is basically the best book we have read through inside my individual life and could be he finest book for ever.*

-- **Enrique Ritchie Sr.**

*This is basically the greatest pdf i have got go through right up until now. It normally fails to cost excessive. Once you begin to read the book, it is extremely difficult to leave it before concluding.*

-- **Genoveva Langworth**
