## An Introduction to Tree-Ring Dating

By Marvin A. Stokes, Terah L. Smiley

University of Arizona Press. Paperback. Book Condition: new. BRAND NEW, An Introduction to Tree-Ring Dating, Marvin A. Stokes, Terah L. Smiley, Tree-ring dating, or dendrochronology, is the study of the chronological sequence of annual growth rings in trees. This book--a seminal study in its field--provides a simple yet eloquent introduction to the discipline, explaining what a dendrochronologist does both in the field and in the laboratory. Authors Stokes and Smiley first explain the basic principles of tree-ring dating, then describe details of the process, step by step, from the time a sample is collected until it is incorporated into a master chronology. The book focuses on coniferous evergreens of the Southwest, particularly pinons, because they have wide geographic distribution, constitute a large population, and show excellent growth response to certain controlling factors. The book is specifically concerned with the task of establishing a calendar date for a wood or charcoal specimen. This concise but thorough explication of an important discipline will make dendrochronology more meaningful to students and professionals in archaeology, forestry, hydrology, and global change.
